

Product: AFSlim© Couplings

Application: Used with AF Slim double pipe arrangements for full piping routings

Description: Couplings for a diverse range of applications when using AF Slim double piping for piping arrangements. Welded and flared type couplings available depending on requirements. A leak detection facility is included in the coupling itself.

Dimensions:

Inner pipe, Inner diameter (mm)	Outer pipe, Outer diameter (mm)
12-16	25,4 / 26,7
17-38	60,3
38-70	88,9

Specification: *Carbon Steels*
Typically according to EN10216-2 or EN10216-3 (between P195 to P690), or ASTM equivalents. For other standards, please enquire

Pressure: up to 800 bar design pressure. Standardised up to ASME 16.5 #2500, or PN420

Temperature: -50°C to 400°C

Stainless Steels
Typically according to EN1.4401 /4, EN1.4462, EN1.4410 or ASTM equivalents. For other standards, please enquire

Pressure: Standardised up to ASME 16.5 #2500, or PN420

Temperature: 100°C to 200°C
